am posting this here, for the information of the group.

> I would like to find the matching
> speaker for the Comet Pro, though, so if you come across the model
> number in your research, it would be helpful. Or even a description!

Andy;

looking thru ads from jan 33 - oct. 33 there is never any mention of
a matching speaker for any of the comet pro's.
however, on the back of the comet pro 4th edition manual xtal-avc model,

they show a picture of the speaker. looks like a square box, w/ squared corners, & mesh screen.
it says: Loud speakers, All "pro" models can be used with magnetic or self-excited dynamic speakers with an input impedance of approx. 4,000 ohms. the special "pro" speaker illustrated, is a permanent dynamic type, mounted in a solid birch cabinet, black crystal finish to match the reciever.
no model number for this speaker is given.

hope this info is of use.

I want to buy a couple of '00A (UX200A) tubes and a couple of '01A (UX201A) tubes along, perhaps, some UX199A and WD11 tubes. I will consider unused or good, used tubes depending on the price and availability.

Does anyone have any suggestions concerning sources for these tubes?

Thanks.

Jim Rybak WOKSD
